

# Programación 1

**Nombre:** Lisbel Martínez Guzmán

**Matricula:** 2024 – 1717

**Día de clases:** Lunes

Usando los conocimientos adquiridos, usted debe desarrollar un programa que le solicite al usuario un número y el programa indique si es par o impar.

```
Program.cs X
par_impar > Program.cs
1 Console.WriteLine("Digit a number: ");
2
3 int num = Convert.ToInt32(Console.ReadLine());
4
5 if (num % 2 == 0)
6 {
7     Console.WriteLine("The number written is Pair");
8 }
9 else
10 {
11     Console.WriteLine("The number written isn't Pair");
12 }
13
14
```

PROBLEMS OUTPUT DEBUG CONSOLE TERMINAL PORTS NUGET

- PS C:\Users\Martha\Documents\MyProjectsc#\par\_impar> dotnet run  
Digit a number:  
9  
The number written isn't Pair
- PS C:\Users\Martha\Documents\MyProjectsc#\par\_impar> dotnet run  
Digit a number:  
6  
The number written is Pair
- PS C:\Users\Martha\Documents\MyProjectsc#\par\_impar>
